Do Androids Dream of Electric Sheep? - Philip K. Dick

Philip K. Dick's Do Androids Dream of Electric Sheep? is a science fiction novel published in 1968. It was originally published as a short story in 1949 in the magazine Galaxy Science Fiction. The novel is set in a dystopian future in which androids have been developed to replace humans who have left Earth to colonize other planets. Rick Deckard, the protagonist, is a bounty hunter tasked with tracking down and eliminating rogue androids that have become a threat to humanity. The book explores themes of identity, consciousness, and what it means to be human. It is often cited as one of the most significant and influential works in the science fiction genre.

Retooling Blade Runner - Judith Kerman

This book offers insights into the themes and influences of Blade Runner, the film directed by Ridley Scott. The book explores the ways in which the film's narrative and visual style were shaped by the sources and inspirations of its creators. It is a valuable resource for fans of the film and for students of science fiction and film studies.

Literary Contexts in Novels

This book provides a detailed examination of the themes and techniques used in science fiction novels. It explores the ways in which authors use scientific and technological concepts to create a futuristic world that raises important questions about the nature of humanity, society, and the relationship between technology and humanity. It is a valuable resource for students of science fiction and for anyone interested in the intersection of science and literature.

The Psychology of Good and Evil

This book provides an in-depth examination of the factors that contribute to good and evil behavior. It explores the ways in which individuals and societies are influenced by a variety of factors, including cultural norms, personal experiences, and psychological processes. It is a valuable resource for students of psychology, religion, and ethics.
